Udemy UE5 Multiplayer game
Udemy Unity 3D physics and collision
Harvard CS50 Computer Science

PROFILE

I'm a software developer with a Bachelor's in Game Software Engineering, driven by curiosity and a constant desire to learn. Having lived in Syria, Italy, and the UK, I've learned to see problems from different perspectives and adapt quickly to new challenges. I love turning ideas into real, functional experiences using tools like C++, C#, Python, Unity, and Unreal, and I'm always looking for ways to grow and push my craft further.
Feel free to take a look at my website.
